Meeting will be devoted to the presentation of the state of the art in the field of of red blood cell structure and function in health and disease. The objectives are to achieve international co-operation of researchers both in academia and medical institutions and to stimulate growth in the field of red blood cells for medical diagnosis and therapy. Simultaneously, red blood cells are model systems for the discovery of general principles in physiology, biophysics, and bioelectrochemistry.

Topics:
erythropoiesis,
genetic disorders of the red cell,
iron and porphyrias
membrane structure and stability
membrane transport
novel technologies
red cell and malaria
blood preservation

Papers:
Papers will be published in the international scientific journal: Cellular & Molecular Biology Letters (Impact Factor 2008: 1.454).

Important dates:
January 15, 2011 – Registration & abstract submission
February 28, 2011 – Deadline for payment
